

MVP BUILD DOCUMENT • V0.1

Portrait

A living career manuscript for the AI era.

Turn your existing work into proof for the roles you' re becoming.

核心产品：AI Talent Passport Generator

适用对象：产品团队、PM、设计、工程与 Codex 构建 MVP

建议周期：2-3 周完成可用 MVP

目录

1. 产品定位与 MVP 假设
2. 目标用户与用户痛点
3. MVP 范围：做什么与不做什么
4. 端到端用户流程
5. AI Talent Passport 内容结构
6. AI 生成流程与 Prompt 模块
7. 数据结构与技术实现建议
8. 页面需求与设计方向
9. 成功指标与收费实验
10. Codex 构建任务拆解
11. 最终 MVP Scope 与长期愿景

1. 产品定位与 MVP 假设

Portrait 是一个面向 AI 时代职业转型者的 AI Talent Passport 生成工具。它帮助用户把已有简历、作品集、项目经历和目标岗位，转译成一份 AI-native teams 能看懂的职业说明书。

一句话：Portrait 帮你把已有作品与经历，转译成未来岗位看得懂的职业证明。

1.1 MVP 核心假设

第一版不指导用户做新项目，也不做完整 career agent。MVP 只验证一个核心假设：

用户愿意上传自己的简历、LinkedIn、作品集和目标岗位，并相信 Portrait 可以把已有经历重新组织成一份更适合 AI-native roles 的职业身份页面。

我们要验证的不是用户是否愿意做 10 天作品集冲刺，也不是公司是否愿意付费招聘。第一版只验证：

- 用户是否愿意提交材料；
- 用户是否觉得生成的 Passport 准确、有洞察、有表达价值；
- 用户是否愿意分享、使用或付费获得这份 Passport；
- 用户是否愿意进一步进入 Proof-of-Work Sprint 或 Talent Network。

2. 目标用户与用户痛点

第一版聚焦一类用户：**2-8 年经验的 product designer / UX designer / researcher / PM / creative technologist**，正在考虑转向 AI-native product roles，但不知道如何重新表达自己的职业身份。

2.1 典型用户痛点

- 我的 title 还是传统 Product Designer / UX Researcher；
- 我的 portfolio 看起来不够 AI-native；
- 我已经做过很多项目，但不知道哪些能证明我适合 AI 产品岗位；
- 我想投 AI startup，但不知道怎么向 founder 介绍自己；
- 我不一定缺新项目，我可能缺一种新的讲法。

C 端真正吸引力：用户不是缺经历，而是缺一份能让 AI 时代机会看懂自己的职业说明书。

3. MVP 范围：做什么与不做什么

3.1 V0.1 明确不做

- 不做 job board、自动投递、B 端招聘后台或用户公开广场；
- 不做完整账号系统、复杂社交网络或实时岗位爬虫；
- 不做自动生成新 proof-of-work 项目；
- 不做全自动能力评分、Talent Credit 总分或排名；
- 不承诺帮用户拿面试或 offer。

3.2 V0.1 只做一个闭环

用户提交材料 -> AI 分析 -> 生成 AI Talent Passport v0 -> 用户查看 / 编辑 / 导出 / 申请加入 waitlist

3.3 核心功能

1. Landing Page
2. Intake Form
3. AI Analysis Pipeline
4. Passport Generation
5. Passport Preview Page
6. Basic Editing
7. Export / Share
8. Feedback Collection
9. Admin Review Panel，低配即可

4. 端到端用户流程

Step 1: Landing Page

用户进入 Portrait 首页。首屏文案：

Portrait

A living career manuscript for the AI era.

Turn your existing work into an AI Talent Passport - a proof-based career identity for the roles you're becoming.

CTA: **Create my AI Talent Passport**

Step 2: 用户填写 Intake

用户填写基本信息并提供材料。

必填字段

- Name
- Current title
- Years of experience
- Target role
- LinkedIn URL 或 resume text
- Portfolio URL 或 project descriptions
- 1-3 个代表性项目
- 1-3 个目标岗位 / 公司链接，可选
- 一句话描述：What do you want future teams to understand about you?

可选字段

- GitHub / demo / Framer / Figma / Notion links
- AI tools used
- Coding comfort level
- Preferred company type
- Location / remote preference
- 是否愿意被推荐给 AI startup

Step 3: AI 生成 Passport

系统基于用户输入生成一份 AI Talent Passport v0。Passport 必须包含：

1. Identity Header
2. What I' m Becoming
3. Best Existing Proof
4. Talent Signals
5. How I Think
6. Letter to Founders
7. Missing Proof / Next Step

Step 4: 用户查看、编辑与反馈

- 用户进入一个漂亮、简洁、可分享的 Passport 页面；
- 支持编辑文字、删除某些 section、重新生成某个 section；
- 支持复制 markdown 或导出 PDF；
- 支持申请加入 beta talent network；
- 支持申请人工 review / proof-of-work sprint waitlist。

5. AI Talent Passport 内容结构

5.1 Identity Header

目标：一句话讲清楚用户现在是谁、正在成为什么。

[Name]
[Current Role] -> [Target AI-native Role]

[One-line positioning]

示例

Claire Zhang
Product Designer -> AI Product Designer / Design Engineer

I design human-AI workflows and build proof-of-work around agentic product experiences.

5.2 What I’ m Becoming

目标：帮助用户重新命名职业方向。不要过度夸张，不要硬说用户已经是某个角色。应该使用 transitioning into / moving toward / strongest alignment 等表述。

I am transitioning from [current role] into [target role].

My strongest starting points are:

- [strength 1]
- [strength 2]
- [strength 3]

The AI-native roles I am most aligned with are:

1. [Role 1] - because [reason]
2. [Role 2] - because [reason]
3. [Role 3] - because [reason]

I am especially interested in teams building:

- [domain 1]
- [domain 2]
- [domain 3]

5.3 Best Existing Proof

目标：从用户已有作品中提炼出“未来岗位可识别的能力证据”。每个项目生成一张 Proof Card。

字段	说明
Project Name	项目名称
Target Role Signal	这个项目最能证明的目标角色
What I built	用户实际做了什么
Why it matters for AI-native roles	为什么这个项目和 AI-native role 有关
Capabilities demonstrated	项目体现出的能力
Tools used	工具与技术
Evidence links	作品链接 / demo / case study / GitHub

示例 Proof Card

AI Research Assistant Onboarding Redesign

Target Role Signal: AI Product Designer

What I built: A redesigned onboarding and feedback loop for an AI research assistant that helps users understand what the agent can do, when to trust it, and how to correct its output.

Why it matters: Many AI products fail not because the model is weak, but because users do not understand the system's boundaries. This project demonstrates expectation-setting, feedback loops, and trust-building patterns.

Capabilities: Human-AI interaction design; workflow decomposition; trust and error-recovery design; product framing; rapid prototyping.

Tools: Figma, Claude, v0, Framer.

5.4 Talent Signals

目标：把用户已有经历转化成能力信号。不要输出总分，不要给人排名。

推荐等级

Strong

Intermediate

Emerging

Basic

Unverified

Needs stronger evidence

推荐能力维度

- Product Framing
- Design Craft
- Human-AI Interaction
- AI Tool Fluency
- Rapid Prototyping
- Coding Fluency
- Shipping Mindset
- User Feedback Loop
- Founder Communication
- Domain Fit
- Risk Appetite

Capability	Current Signal	Evidence
Product Framing	Strong	Clear problem framing and tradeoff reasoning in project X
Human-AI Interaction	Emerging	Shows awareness of feedback loops and failure states
Rapid Prototyping	Basic	Has Figma prototype, but no working demo yet

5.5 How I Think

目标：展示用户不是技能商品，而是一个有判断力、有审美、有动机的创造者。

- On AI Products
- On Design / Product
- On Building
- On Teams

要求：语气应该像用户本人；不要太像 AI corporate writing；应该有观点，而不是空话；可以基于用户输入推断，但不能编造不存在的经历。

5.6 Letter to Founders

目标：生成一封 founder-facing intro，不是求职信模板。

Hi,

I'm [name], currently a [current role], and I'm transitioning into [target role].

I'm especially interested in [domain] because [reason].

What I can bring:

- [strength 1]
- [strength 2]
- [strength 3]

I may not be the traditional [target title] on paper, but I have built proof around [evidence], and I'm actively developing [growth area].

I'm looking for a team where I can help [specific contribution].

Best,
[name]

5.7 Missing Proof / Next Step

目标：告诉用户下一步最该补什么，而不是泛泛建议“学习 AI”。

Your strongest current signals are:

- [signal 1]
- [signal 2]

The missing proof is:

- [missing proof]

Recommended next proof-of-work:

- [specific mini project idea]

Why this matters:

- [reason]

6. AI 生成流程与 Prompt 模块

6.1 Pipeline Overview

```
Input Collection
-> Profile Normalization
-> Role Inference
-> Project Extraction
-> Proof Reframing
-> Talent Signal Generation
-> Founder Letter Generation
-> Missing Proof Recommendation
-> Passport Assembly
```

6.2 Prompt Modules

建议不要用一个大 prompt 完成所有内容。拆成多个模块，方便调试和局部重生成。

Module 1: Profile Normalization

```
{
  "name": "",
  "current_title": "",
  "years_experience": "",
  "target_roles": [],
  "domains_of_interest": [],
  "projects": [],
```

```
"tools": [],
"strengths": [],
"gaps": [],
"tone_preferences": ""
}
```

Module 2: Role Inference

```
{
  "primary_target_role": "",
  "secondary_target_roles": [],
  "reasoning": "",
  "role_fit_notes": []
}
```

Module 3: Project Reframing

```
{
  "proof_cards": [
    {
      "project_name": "",
      "target_role_signal": "",
      "what_i_built": "",
      "why_it_matters": "",
      "capabilities_demonstrated": [],
      "tools_used": [],
      "evidence_links": []
    }
  ]
}
```

Module 4: Talent Signals

```
{
  "talent_signals": [
    {
      "capability": "",
      "level": "",
      "evidence": ""
    }
  ]
}
```

Module 5: Narrative Generation

```
{
  "identity_header": "",

```

```
"what_im_becoming": "",
"how_i_think": {
  "on_ai_products": "",
  "on_design": "",
  "on_building": "",
  "on_teams": ""
},
"letter_to_founders": ""
}
```

Module 6: Missing Proof

```
{
  "strongest_signals": [],
  "missing_proof": "",
  "recommended_next_project": "",
  "why_it_matters": ""
}
```

6.3 AI 输出原则

1. **不要夸大用户能力。** 如果用户没有代码经历，不要说她是 design engineer，只能说 moving toward design engineering。
2. **不要编造经历。** 没有 evidence 的能力标为 Unverified。
3. **不要生成总分。** 只生成 capability signals。
4. **不要过度职业鸡汤。** 语气要清晰、克制、有审美。
5. **不要写成传统 cover letter。** Letter to Founders 应该像自然介绍，而不是 HR 模板。
6. **输出要可编辑。** 所有 section 都应允许用户手动修改。

7. 数据结构与技术实现建议

7.1 推荐技术栈

- Frontend: Next.js / React
- Styling: Tailwind CSS
- Backend: Next.js API routes
- Database: Supabase / SQLite / Postgres
- Auth: 第一版可不用完整 auth，使用 magic link 或 email-based session
- AI: OpenAI API / Claude API
- Export: HTML to PDF 可后置；第一版先支持 copy markdown

- Deployment: Vercel

7.2 页面结构

```
/
Landing Page

/create
Intake Form

/generating
Loading / AI generation progress

/passport/[id]
Passport Preview + Edit

/admin
Basic submission review list
```

7.3 核心数据结构 TypeScript

```
type User = {
  id: string;
  email?: string;
  name: string;
  createdAt: string;
};

type Intake = {
  id: string;
  userId: string;
  currentTitle: string;
  yearsExperience?: string;
  targetRoles: string[];
  linkedinUrl?: string;
  resumeText?: string;
  portfolioUrl?: string;
  projectDescriptions: ProjectInput[];
  targetJobUrls?: string[];
  targetCompanyUrls?: string[];
  toolsUsed?: string[];
  codingComfort?: string;
  desiredOpportunity?: string;
  rawNotes?: string;
  createdAt: string;
};

type ProjectInput = {
  title: string;
```

```

    description: string;
    link?: string;
    tools?: string[];
    userSelectedImportance?: "high" | "medium" | "low";
};

type Passport = {
    id: string;
    userId: string;
    intakeId: string;
    status: "draft" | "published";
    identityHeader: IdentityHeader;
    whatImBecoming: string;
    proofCards: ProofCard[];
    talentSignals: TalentSignal[];
    howIThink: HowIThink;
    letterToFounders: string;
    missingProof: MissingProof;
    createdAt: string;
    updatedAt: string;
};

```

```

type IdentityHeader = {
    name: string;
    currentRole: string;
    targetRole: string;
    positioningLine: string;
};

type ProofCard = {
    projectName: string;
    targetRoleSignal: string;
    whatIBuilt: string;
    whyItMatters: string;
    capabilities: string[];
    toolsUsed: string[];
    evidenceLinks: string[];
};

type TalentSignal = {
    capability: string;
    level: "Strong" | "Intermediate" | "Emerging" | "Basic" | "Unverified" | "Needs stronger evidence";
    evidence: string;
};

type HowIThink = {
    onAIProducts: string;
    onDesign: string;
    onBuilding: string;
    onTeams: string;
};

```

```
};

type MissingProof = {
  strongestSignals: string[];
  missingProof: string;
  recommendedNextProject: string;
  whyItMatters: string;
};
```

8. 页面需求与设计方向

8.1 Landing Page

Must Have

- Brand name: Portrait
- Tagline: A living career manuscript for the AI era.
- Explanation
- CTA button
- Example Passport preview
- Waitlist / create flow

Portrait

A living career manuscript for the AI era.

Your resume says where you've been.

Portrait helps show what you're becoming.

Turn your existing work into an AI Talent Passport - a proof-based career identity for AI-native roles.

8.2 Intake Form

Form Sections:

1. Basic Info
2. Current Materials
3. Projects
4. Target Direction
5. AI / Coding Fluency

6. Desired Output

UX Requirement: Multi-step form preferred; Progress indicator; Save draft optional; Allow long text; Allow URLs; File upload optional, 先可以只支持 text / URL。

8.3 Generating Page

Reading your career materials...
Identifying your strongest proof...
Reframing your projects for AI-native roles...
Extracting talent signals...
Writing your founder-facing letter...
Creating your AI Talent Passport...

8.4 Passport Preview Page

展示 6-7 个 section。必须支持：

- Edit section
- Regenerate section
- Copy section
- Copy full markdown
- Submit feedback
- Mark as publishable

第一版可以不做复杂公开分享，只需要 private URL。

8.5 Admin Page

给团队查看用户提交材料、AI 输出、用户反馈、是否需要人工修正、是否可作为 demo case。第一版低配即可。

8.6 Design Direction

维度	建议
视觉关键词	Editorial, Soft, Personal, Manuscript, Minimal, Founder-facing
参考气质	Bonjour.bio, Read.cv, Notion page, Linear changelog, Are.na, Substack profile
避免	不要像 HR software, 不要像 resume builder, 不要做成 gamified dashboard
色彩	warm off-white / near black / deep blue / muted violet / ink blue
字体	Serif for headings; Sans for body

9. 成功指标与收费实验

9.1 Activation

- $\geq 30\%$ landing page 访问者点击 Create
- $\geq 50\%$ 开始表单的人完成 intake
- $\geq 70\%$ 完成 intake 的用户愿意查看生成结果

9.2 Value

- $\geq 60\%$ 用户觉得 Passport “比普通简历/作品集更能表达自己”
- $\geq 50\%$ 用户愿意修改后用于真实求职/自我介绍
- $\geq 30\%$ 用户愿意推荐给朋友
- $\geq 20\%$ 用户愿意为人工 review / premium version 付费

9.3 Learning

- 用户最喜欢哪个 section?
- 用户觉得哪个 section 最 AI 味 / 最不准?
- 用户是否愿意上传真实作品?
- 用户是否觉得 Talent Signals 有帮助?
- 用户是否愿意进一步做新的 proof-of-work?

9.4 第一版收费实验

V0.1 可以先免费 beta，但必须测试付费意愿。完成 Passport 后展示：

Want a human-reviewed version?
Get a founder-facing rewrite, stronger talent signals, and a missing-proof action plan.

价格	实验内容
\$19	Priority generation
\$49	Human-reviewed Passport
\$99	Passport + 30-min review
\$299	Passport + Proof-of-Work Sprint waitlist

短期不要强制收费。先看点击意愿和报名意愿。

10. Codex 构建任务拆解

Task	说明
Task 1: Initialize App	创建 Next.js app，配置 Tailwind，建立基础 layout。
Task 2: Landing Page	实现 / 页面，包括 Hero、Explanation、Example Passport mock、CTA button。
Task 3: Intake Form	实现 /create 多步表单。表单提交后保存到数据库或本地 JSON。
Task 4: AI Generation API	实现 /api/generate-passport。输入 intake JSON，输出 passport JSON。先可以 mock AI output，后接 OpenAI/Claude。
Task 5: Passport Page	实现 /passport/[id]，展示所有 Passport section。
Task 6: Editing	每个 section 支持 edit、save、copy、regenerate。第一版 regenerate 可调用对应 section prompt。
Task 7: Feedback	实现简单 feedback form：How useful was this? What felt accurate? What felt wrong? Would you use this? Would you pay?
Task 8: Admin View	实现 /admin 页面，列出所有 submissions 和 passports。

11. Prompt System 草案

11.1 System Prompt

You are Portrait, an AI career manuscript agent.

Your job is to help people translate their existing work into proof-based career identities for AI-native roles.

You do not exaggerate. You do not invent experience. You do not assign a total score. You identify transferable proof, clarify role positioning, and write in a warm, editorial, founder-facing voice.

You should help the user sound more precise, more credible, and more alive - not more corporate.

11.2 Generation Instruction

Given the user's background, projects, target roles, and materials, generate an AI Talent Passport.

The output must include:

1. Identity Header
2. What I'm Becoming
3. Best Existing Proof
4. Talent Signals
5. How I Think
6. Letter to Founders
7. Missing Proof / Next Step

Use only evidence provided by the user. If a capability is not clearly supported, mark it as Emerging, Basic, Unverified, or Needs stronger evidence.

Write in a clear, warm, editorial style. Avoid generic resume language.

12. 最终 MVP Scope 与长期愿景

12.1 必须完成

- Landing page
- Intake form
- AI Passport generation
- Passport preview
- Basic edit
- Feedback
- Copy markdown

12.2 可以后置

- PDF export
- Public share page
- Auth
- Payment

- Job scan
- Talent network
- Full proof-of-work sprint
- B2B dashboard

12.3 Final Product Summary

Portrait

A living career manuscript for the AI era.

Portrait helps users turn their existing work into an **AI Talent Passport** - a proof-based career identity for AI-native roles.

The first MVP does not create new projects. It helps users reframe the work they already have.

长期愿景是成为 proof-of-work era 的 agentic career infrastructure: career agents 帮助人们表达、证明和增长能力; talent signal layer 帮助公司发现 emerging AI-native talent。
